Chapter 1 The Nature of Chemistry ... Solid objects move as one object and there is no fluidity in the motion of a single solidâ€”powdered solids like salt and sugar consist of many solid particles and while the powder may appear to have fluid motion, each particle in the solid moves as a single object. Estimating Macroscale, Microscale, and Nanoscale Sizes (1.8) When discussing macroscale ...

â€¢ Whenever a section plane cuts a solid, it intersects (and or coincides with) the edges of solids. The point at which the section plane intersects an edge of the solid is called the point of intersection (POI). A section view is created by passing an imaginary cutting plane vertically through the center of the part. This figure is a 3D representation of the part after it is sectioned. This ...
